🚀 How to Sell GEO Services to Local Businesses

A Step-by-Step Playbook

🎯 Step 1: Pick Your Niche

Best targets (they already spend money on marketing):

Business Type	Why They'll Pay	Average Client Value
💉 Med Spas / Cosmetic Clinics	High-ticket treatments ($500-$5K each). They spend $5K-$15K/mo on Google Ads already.	$2K-$4K/mo
⚖️ Law Firms (PI, Immigration, Business)	One client worth $5K-$50K+. They spend $10K-$50K/mo on Google Ads.	$3K-$5K/mo
🦷 Cosmetic / Multi-Location Dentists	Implants, Invisalign, veneers = $3K-$30K per patient.	$2K-$3K/mo
🏠 Real Estate Teams / Brokerages	One home sale = $15K-$30K commission.	$2K-$5K/mo

🔨 Luxury Home Services (Remodeling, Solar)	Average job $15K-$100K.	$1.5K-$3K/mo

👉 **Pick ONE niche to start.** Don't try to serve everyone.

🔍 Step 2: Find 10 Prospects

Where to find them:

1. 📍 **Google Maps** — Search "med spa [your city]" or "immigration lawyer [your city]"
2. 💰 **Google Ads** — Search their keywords. Whoever is running ads already has marketing budget.
3. ⭐ **Yelp** — Sort by highest reviewed businesses. They care about online presence.
4. 💼 **LinkedIn** — Search for owners or marketing managers at these businesses.
5. 📸 **Instagram** — Med spas and dentists with 5K+ followers are actively marketing.

What you're looking for:

- ✅ Has a real website (not just a Facebook page)
- ✅ Already spending money on marketing (Google Ads, social media, Yelp ads)
- ✅ Has competition in their area
- ❌ NOT a solo one-person operation — they need to have some revenue

Make a list of 10 businesses with:

- Business name
- Website URL
- Owner or marketing manager name

- Email address (check their website's contact page or use Apollo.io / Hunter.io)

⚡ Step 3: Run Free Audits on All 10

Open Claude Code and run:

/geo audit https://their-website.com

Then generate the PDF:

/geo report-pdf

Save each PDF with the business name. You now have 10 professional audit reports ready to send.

🔑 **What to look for in the results (your talking points):**

- 📊 **GEO Score below 50** — almost everyone will be
- 🚫 **AI crawlers blocked** — AI search engines like ChatGPT and Perplexity send "bots" (called crawlers) to read websites, just like Google sends Googlebot. If these AI crawlers are blocked, it means AI literally cannot read the website and will never recommend that business.
- 📄 **No llms.txt file** — This is a new simple text file that you put on your website (like sitemap.xml but for AI). It tells AI systems what your business does, what pages are most important, and how to understand your site. Almost nobody has one yet, which means AI is guessing instead of knowing.

- 🏷️ **Missing schema markup** — Schema is invisible code added to a website that labels everything for AI — "this is our business name, this is our address, these are our services, these are our reviews, this is the owner." Without it, AI has to figure everything out on its own. With it, AI knows exactly what the business is and is way more likely to recommend it.
- 💬 Weak brand mentions on Reddit/YouTube
- 📉 Low citability scores

📧 Step 4: Send the Cold Email

Subject line: "AI search engines can't find [Business Name]"

Email:

> Hi [First Name],
>
> I ran an AI visibility analysis on [website URL]. Your site is scoring [score]/100 — which means when people ask ChatGPT, Perplexity, or Google's AI for recommendations in [their industry], [Business Name] isn't showing up.
>
> I attached the full report. The biggest issue I found: [one specific finding in plain English — e.g., "AI crawlers are completely blocked from your site" or "your brand has almost no mentions on the platforms AI trusts"].
>
> AI search is growing 500%+ year-over-year and that traffic converts 4x higher than regular Google traffic. This is going to matter a lot over the next 12 months.

Happy to walk through the report on a quick 15-minute call. No pitch — just showing you what's in there.

[Your name]

📎 **Attach the PDF to the email.**

📨 **Send all 10 emails.** Expect 2-3 replies. You only need 1 client to start.

📞 Step 5: The Discovery Call (15-20 min)

What to do on the call:

1. 🖥️ **Share your screen and open their PDF report** (2 min)
   - "I ran this analysis on your website — let me show you what I found."
2. 📊 **Show the GEO Score** (1 min)
   - "You scored a [number] out of 100. Most businesses I've analyzed score between 30 and 50."
3. 🔎 **Walk through 3 findings they'll understand** (5-7 min)
   - Pick the ones that sound the most alarming:
   - "AI crawlers are blocked — ChatGPT literally cannot read your website"
   - "When someone asks AI for [their service] in [their city], you're not coming up"
   - "Your competitors at [competitor name] are doing better in these areas"
4. ⚠️ **Explain why this matters** (2-3 min)
   - "More and more people are asking AI instead of Googling. That traffic converts 4x higher. Right now, your competitors are getting those leads and you're not."

5. 🤝 **The close** (2 min)
    - "I can fix all of this. I'd handle everything — the technical fixes, content optimization, brand building. We'd meet monthly and I'd show you the score improving. It's $[price]/month."
    - If they hesitate: "Want to start with a one-time optimization? I'll fix the critical issues for $[500-1500] and we can see how it goes."

💵 Step 6: Pricing

Package	What's Included	Price
⚡ **One-Time Audit + Fix**	Full GEO report + fix critical issues (robots.txt, llms.txt, schema markup)	$500-$1,500
📈 **Monthly Retainer (Starter)**	Monthly audit + technical fixes + content optimization (5-10 pages) + monthly report & call	$2,000-$3,000/mo
🚀 **Monthly Retainer (Growth)**	Everything above + brand mention building + platform-specific optimization + competitor monitoring	$3,000-$5,000/mo

💡 **Start with the one-time package if they're hesitant.** Once they see results, upsell to monthly.

🛠️ Step 7: What You Actually Do Each Month

Week 1:

- 🔍 Run the full GEO audit
- ⚙️ Fix technical issues (robots.txt, AI crawler access, site speed)
- 📄 Create/update llms.txt file
- 🏷️ Add or fix schema markup (JSON-LD)

Week 2-3:

- ✍️ Rewrite top pages for AI citability (clear headings, fact-rich passages, 134-167 word answer blocks)
- 📣 Build brand mentions (Reddit, LinkedIn, directories, industry listings)
- 🎯 Optimize for specific AI platforms (ChatGPT, Perplexity, Google AI Overviews)

Week 4:

- 📊 Re-run the audit — show score improvement
- 📑 Generate updated PDF report
- 📞 Monthly call with client — walk through progress

🔑 **Your tool does the diagnosis. You do the fixes. Bill monthly.**

📐 The Math

📧 Send 10 cold emails per week	~40/month

💬 Response rate	10-20% (4-8 responses)
📞 Call booking rate	50% (2-4 calls)
🤝 Close rate	25-50% (1-2 new clients)
💰 Average client value	$2,500/month
🚀 After 3 months (3-6 clients)	$7,500-$15,000/month

💥 **One client at $2,500/month = $30,000/year from one email you sent.**

✅ Quick Reminders

- 🧠 **You don't need experience.** The report is your credibility. Let the PDF do the talking.
- 🤖 **You don't need to be an SEO expert.** The tool tells you exactly what's wrong. You follow its recommendations.
- 🎯 **Start with ONE niche.** Don't sell to dentists, lawyers, and med spas at the same time. Pick one, get good at it, expand later.
- 📊 **Re-run audits monthly.** Clients love seeing their score go up. That's what keeps them paying.
- 📸 **Your first client is your case study.** Document the before/after scores. Use that to close the next 5 clients.
